

SAMIUL ISLAM

Gameplay Programmer

PROFILE

Gameplay Programmer with 4 years of experience developing interactive gaming systems using object-oriented programming, design patterns, and modular game architectures. Proven track record of delivering commercial game titles, implementing complex gameplay mechanics and AI algorithms, and working with real-time systems and player data management.

PORTFOLIO

https://docs.google.com/presentation/d/1nhMZxyz4VFVqC6FQeuASqK2pb_gQOCCm/edit?usp=drive_link&oid=106133022115761563625&rtpof=true&sd=true

ACHIEVEMENTS AND EXTRA CURRICULAR ACTIVITIES

Research Paper published at the 8th IEEE CSDE, Brisbane conference
Link:

www.researchgate.net/publication/358953787_Real_world_objects_augmentation_in_virtual_3D_environment_RealSense_SDK_Deep_Learning_and_Game_Engine

Former Lead Initiator at Shonjibon Blood Donation Community of BRACU

Former Assistant Director at BRAC University Adventure Club

Participated and completed
Bangabandhu Dhaka Marathon (21 km)
in 2017

Worked as Assistant Trainer at Capacity Building for Mobile Game Development
Organized by ICT Ministry of Bangladesh

EXPERIENCE

❖ Bad WiFi Interactive | Gameplay Programmer

September 2024 – Current

Key Responsibilities in the Company

- **Gameplay Programming** – Developed core gameplay mechanics including character movement, attack systems, damage calculations, dodge mechanics, and player interactions using Unity and C#.
- **Systems Programming** – Built game systems with Factory Pattern, Object Pooling, Observer Pattern, and MVC architecture following SOLID principles for scalable development.
- **UI Development** – Created and implemented all user interface elements and interactive UI systems to enhance player experience and game usability.
- **Framework Integration** – Implemented Zenject, Addressables, and UniRx for dependency injection, asset management, and reactive programming optimization.
- **Animation & Performance** – Developed index-based animation systems using Scriptable Objects and optimized performance through memory management and efficient asset loading.

Projects:

▪ Kingdoms of the Cosmos

Currently working on Pixel Art 2D Isometric Hybrid Story-based Kingdom-building Bullet Heaven game

Game Engine: **Unity** | Programming Language: **C#**

Patterns in use- Factory Pattern, Object Pooling, Observer Pattern, Scriptable Objects

Plugins and Frameworks- Zenject, Addressables, UniRx

❖ Red Thorn Interactive | Gameplay Programmer

December 2021 – August 2024

Key Responsibilities in the Company

- **Gameplay & Systems Programming** – Designed and implemented core mechanics including combat systems, procedural generation, AI behavior, turn-based logic, inventory management, and skill trees across 2D and strategic environments.
- **UI/UX & Tool Development** – Built dynamic, responsive interfaces and internal editor tools for battle scenes, inventory systems, animation setup, and streamlined testing workflows to enhance player experience and development efficiency.

EDUCATION

BRAC University

Bachelors of Science in Computer Science and Engineering (CSE)
2016 – 2021

Bangladesh International School & College

Higher School Certificate | Science
2015

Bangladesh International School

Secondary School Certificate | Science
2013

TECHNICAL SKILLS

Programming Languages- C#, Java, Dart
Algorithms- Procedural Generation, Pathfinding, Finite State Machine, Searching, Sorting
Patterns- MVC, Observer Pattern, Dependency Injection, Singleton Pattern, State Pattern, Scriptable Objects
Architectures- Component Based Architecture
Plugins- Zenject, UniRx,

SOFTWARE AND TOOLS PROFICIENCY

Game Engine- Unity3D, Godot
Version Control System- GitHub
Realtime Database- Firebase
3D Modeling- Blender
Multiplayer Networking- Mirror, Netcode
Android Application Development Editor- Flutter

SOFT SKILLS

Collaboration
Problem Solving
Debugging
Organizing and Prioritizing
Time Management

ADDITIONAL SKILLS

Language- Bangla (Fluent), English (Fluent)
Microcontroller - Proficient in **Arduino** programming (C++)
Microsoft Office - Proficient in **Word, Excel, PowerPoint**
Adobe - Proficient in **Photoshop, Illustrator, XD**
Video Editor - **Filmora Wondershare**

- **Technical Design & Prototyping** – Prototyped and balanced gameplay elements, tuned mechanics for strategic depth, and iterated on features based on testing feedback while maintaining scalable code architecture using Component-Based Design patterns.
- **Audio Integration & QA** – Implemented contextual sound systems and conducted comprehensive debugging, optimization, and feature refinement based on player feedback and quality assurance testing.
- **Content & Systems Integration** – Developed and integrated campaign and multiplayer modes while ensuring cohesive gameplay systems worked seamlessly across different game modes and environments.

Projects:

▪ Alexanderball: A Countryball Tale

Successfully developed and published Alexanderball, a **Turn-Based Strategy** and Storytelling PC game that **achieved around 8,000 sales** on Steam with a team of 3 developers in a **time period of 1 and half years**

Game Engine: Unity | Programming Language: C#

Steam Link:

https://store.steampowered.com/app/1944660/AlexanderBall_A_Countryball_Tale/

▪ Museum Keeper

A 2d platformer pixel art **museum management** and adventure game featuring **procedural dungeon generation, dynamic NPC interactions, resource management systems, and real-time combat mechanics**

Developed and refined gameplay features such as combat mechanics, procedural generation, inventory system, data storage and transfer to enhance the overall user experience

Game Engine: Godot | Programming Language: C#

Steam Link: https://store.steampowered.com/app/2708780/Museum_Keeper/

❖ Opus Technology Limited | **Junior Game Developer** June 2021

Joined as **Game Developer** and worked on an **Online Multiplayer** PC game

Game Engine: Unity | Programming Language: C#

❖ Team Reboot | **Trainee Game Developer**

Joined Team Reboot as a **Trainee Developer**, learned the basics of game development with **Unity Game Engine** and **implemented** the basic structure of an **Infinite Runner** game
